1-Verifying Dress Search Results Test Case

Test Case ID	#1
Test Case	Searching for a Dress
Test Steps	1. Open the website browser. 2. Enter 'dress' in the search input field. 3. Click the search button. 4. Wait for the product list to be visible. 5. Count the number of items in the product list. 6. Verify that the number of items is equal to 7. 7.End the test.
Expected Results	The system should display a list of 7 items when searching for a dress.
Actual Results	The system displays a list of 7 items when searching for a dress.
Test Data	Search Query: dress
Status	Pass

2-ContactUs Test Cases

Test Case ID	#1
Test Case	All fields are empty
Test Steps	1-Open the contact page. 2-Verify that the submit button is visible. 3-Click the submit button without entering any information. 4-Verify that an error message is displayed. 5-Verify that the error message contains the text "There is 1 error" and "Invalid email address."
Expected Results	The system should display an error message indicating that there is 1 error and an invalid email address.
Actual Results	The system displays an error message indicating that there is 1 error and an invalid email address.

Test Data	None
Status	Pass

Test Case ID	#2
Test Case	Entering an email only
Test Steps	1. Open the contact page. 2. Enter the email 'reem@gmail.com' in the email input field. 3. Verify that the submit button is visible. 4. Click the submit button. 5. Wait for 2 seconds. 6. Verify that an error message is displayed. 7. Verify that the error message contains the text "There is 1 error" and "The message cannot be blank."
Expected Results	The system should display an error message indicating that there is 1 error and the message cannot be blank.
Actual Results	The system displayed an error message indicating that there is 1 error and the message cannot be blank.
Test Data	Email: 'reem@gmail.com'
Status	Pass

Test Case ID	#3
Test Case	Entering an email only
Test Steps	1. Open the contact page. 2. Verify that the default subject heading is "-- Choose --". 3. Select the "Webmaster" option from the subject heading dropdown. 4. Verify that the selected subject heading is now "Webmaster". 5. Click the submit button. 6. Verify that an error message is displayed.

	7. Verify that the error message contains the text "There is 1 error" and "Invalid email address."
Expected Results	The system should display an error message indicating that there is 1 error and an invalid email address.
Actual Results	The system displays an error message indicating that there is 1 error and an invalid email address.
Test Data	Subject Heading: Webmaster
Status	Pass

Test Case ID	#4
Test Case	Entering an email only
Test Steps	1. Open the contact page. 2. Enter the order reference '1359' in the order reference input field. 3. Verify that the submit button is visible. 4. Click the submit button. 5. Verify that an error message is displayed. 6. Verify that the error message contains the text "There is 1 error" and "Invalid email address."
Expected Results	The system should display an error message indicating that there is 1 error and an invalid email address.
Actual Results	The system displays an error message indicating that there is 1 error and an invalid email address.
Test Data	Order Reference: 1359
Status	Pass

Test Case ID	#5
Test Case	Attaching a file only

Test Steps	1. Open the contact page. 2. Attach the file located at 'D:\\siemens\\test.txt'. 3. Wait for 2 seconds. 4. Verify that the attached file name is displayed as 'test.txt'. 5. Verify that the submit button is visible. 6. Click the submit button. 7. Verify that an error message is displayed. 8. Verify that the error message contains the text "There is 1 error" and "Invalid email address." 9. Verify that the attached file name is displayed as 'No file selected'.
Expected Results	The system should display an error message indicating that there is 1 error and an invalid email address. The attached file name should be displayed before and after submission.
Actual Results	The system displays an error message indicating that there is 1 error and an invalid email address. The attached file name is displayed before and after submission.
Test Data	File Path: 'D:\\siemens\\test.txt'
Status	Pass

Test Case ID	#6
Test Case	Entering a message only
Test Steps	1. Open the contact page. 2. Enter the message 'i am writing a test message containing numbers and special characters 1234, &^%&' in the message input field. 3. Verify that the submit button is visible. 4. Click the submit button. 5. Verify that an error message is displayed. 6. Verify that the error message contains the text "There is 1 error" and "Invalid email address."
Expected Results	The system should display an error message indicating that there is 1 error and an invalid email address.

Actual Results	The system displays an error message indicating that there is 1 error and an invalid email address.
Test Data	Message: 'i am writing a test message containing numbers and special characters 1234, &^%&'
Status	Pass

Test Case ID	#7
Test Case	Entering an email and subject heading only
Test Steps	1. Open the contact page. 2. Enter the email 'reem@gmail.com' in the email input field. 3. Verify that the submit button is visible. 4. Wait for 2 seconds. 5. Verify that the default subject heading is "-- Choose --". 6. Select the "Webmaster" option from the subject heading dropdown. 7. Verify that the selected subject heading is now "Webmaster". 8. Click the submit button. 9. Verify that an error message is displayed. 10. Verify that the error message contains the text "There is 1 error" and "The message cannot be blank."
Expected Results	The system should display an error message indicating that there is 1 error and the message cannot be blank.
Actual Results	The system displays an error message indicating that there is 1 error and the message cannot be blank.
Test Data	Email: 'reem@gmail.com' Subject Heading: Webmaster
Status	Pass

Test Case ID	#8

Test Case	Entering an email and Order reference only
Test Steps	1. Open the contact page. 2. Enter the email 'reem@gmail.com' in the email input field. 3. Enter the order reference '1359' in the order reference input field. 4. Wait for 2 seconds. 5. Click the submit button. 6. Verify that an error message is displayed. 7. Verify that the error message contains the text "There is 1 error" and "The message cannot be blank."
Expected Results	The system should display an error message indicating that there is 1 error and the message cannot be blank.
Actual Results	The system displays an error message indicating that there is 1 error and the message cannot be blank.
Test Data	Email: 'reem@gmail.com' Order Reference: 1359
Status	Pass

Test Case ID	#9
Test Case	Entering an email and attaching a file only
Test Steps	1. Open the contact page. 2. Enter the email 'reem@gmail.com' in the email input field. 3. Attach the file located at 'D:\\siemens\\test.txt'. 4. Wait for 2 seconds. 5. Verify that the attached file name is displayed as 'test.txt'. 6. Verify that the submit button is visible. 7. Click the submit button. 8. Verify that an error message is displayed. 9. Verify that the error message contains the text "There is 1 error" and "The message cannot be blank." 10. Verify that the attached file name is displayed as 'No file selected'.

Expected Results	The system should display an error message indicating that there is 1 error and the message cannot be blank. The attached file name should be displayed before and after submission.
Actual Results	The system displays an error message indicating that there is 1 error and the message cannot be blank. The attached file name is displayed before and after submission.
